START STRONG WITH THE RIGHT PREP.

Remove all debris, dirt and dust from the surface. Then scrub the floor with **H&C® ConcreteReady® Cleaner/Degreaser**, rinsing and drying completely.

Etching is an essential step.

Etching concrete with **H&C ConcreteReady Etching Solution** prepares the surface to be coated by opening up the pores of concrete so H&C coatings can properly bond with the surface. It ensures proper adhesion and an even finish.

PRO TIPS:

- Use H&C SHARKGRIP® Slip-Resistant Additive in all H&C Solid Color Stains to make concrete surfaces less slippery
- Use Purdy® brushes and Sherwin-Williams Contractor Series® polyester 3/8" roller covers for the best application results

*Reduces surface temperature when compared to bare concrete. Amount of temperature reduction may differ due to: color choice, ambient temperature, time of day and the amount of direct sunlight on the surface.

Clear Concrete Sealers

hconcrete.com

Selecting the right product will depend on the type of project and the look you're trying to achieve.

WATER BASED

Provides excellent protection and easy soap and water cleanup. **Great for both interior and exterior applications.**

SOLVENT BASED

Adds depth of color and enhances appearance of concrete and pavers. **Solvent-based clears are formulated for exterior applications.**
